

MASSACHUSETTS RENTAL VOUCHER PROGRAM

Support funding of \$120M for MRVP (line item 7004-9024) in FY2018.

MRVP provides housing stability and security to more than 8,000 extremely low income households, including elders, disabled individuals and families with children.

FY2018 FUNDING REQUEST: \$120 MILLION

RECENT SUCCESSES WITH MRVP:

- A reduction in the state's reliance on motels to house families experiencing homelessness;
- An increase of over 900 new units to the Commonwealth's supportive housing portfolio; and
- The preservation of affordability in units that would have otherwise been lost due to the loss of federal supports.

WHY NOW?

- The number of households experiencing housing instability and homelessness persists as Massachusetts remains one of the most expensive states in the nation in which to live.
- More than 240,000 MA low income renters pay more than 50% of their monthly income toward housing expenses alone.
- HUD's 2015 *Family Options Study* demonstrated that families experiencing homelessness who secured a housing voucher experienced significantly better outcomes than other interventions. Families able to access vouchers were less likely to reenter homelessness; more often remained intact while being able to reduce the number of school interruptions for their children and significantly decrease their levels of toxic stress, including domestic violence.

WHAT WILL \$120M FOR MRVP IN FY2017 ACCOMPLISH?

- Annualize the cost of new supportive housing units and current vouchers, while providing approximately 1,500 new mobile and project based vouchers
- Improve MRVP's effectiveness and reduce the amount of time it takes for voucher holders to obtain housing by setting allowable rents at HUD's area-wide, annually updated Fair Market Rent (currently \$1,691 for a 2-bedroom in the Boston area), setting the baseline for vouchers that work more effectively in the current market
- Increase the income cap from 50% of the area median income to 80%; providing families a pathway to housing and economic stability
